

About Healthspace

- Release: InstantAtlas™ Server v6.6.0

Healthspace has been developed by Massey University in collaboration with the Māori Health Directorate, New Zealand Ministry of Health.

Healthspace is targeted towards anyone wanting to access and visualise public health data, from high school students to health policy makers.

Healthspace is a repository for data from a wide range of organisations, each of whom take responsibility for the information they submit. Whilst every effort has been made to ensure accuracy, responsibility for

For more information on individual data click on the metadata icon

All data displayed on Healthspace is from publically available sources.
